TechnoMould S.R.L.

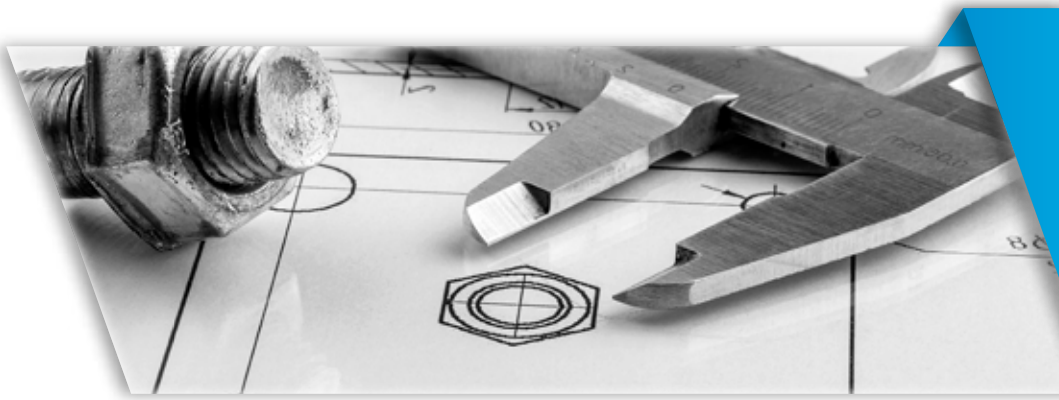
CONSTRUCTION • DISTRIBUTION • SALES
INDUSTRIAL EQUIPMENT AND MOLDS

Our projects:

The different types of products and moulds we dealt with in these years in the medical, cosmetic, food and packaging industry, enabled Technomould to become a partner of reference for international and national companies.

Technomould supports every client in supplying both moulds and assembly machines, realizing “turnkey” projects.

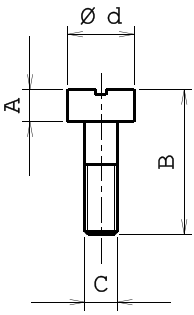
MEDICAL · FOOD · COSMETIC · PACKAGING



An italian excellence

Technomould was born from thirty years of experience in the production of molds and mechanical components. The company has always been present on the national and international market as a supplier of molds and mechanical components, mainly intended for the thermoplastic industry.

Technomould supports the customer with attention and commitment, evaluating every request and proposing the best technical solutions in the Italian market.



STANDARD INNER INSERT

Steel: stainless steel - Hardness 48-52 HRC

The inner insert is supplier with spring

Technical Specification

Our products are realized with stainless steel with a 48-52 HRC hardness, recommended for use at a maximum temperature of 140°C.

The inner insert replacement is accomplished by unscrewing the inner insert with a screwdriver inserted in the arrow.

Then, screw the new inner insert all the way to the end and then align the inner insert's arrow in your desired location.

The bodies and the inner inserts are sold separately in order to create your desired configuration.
